DaSSH4: Hackathon Preparation

Hackathon activities

This is just a suggestion....

- Thursday
  - LogicaHealth & CIBMTR Reporting App
- Friday
  - Direct FHIR API
  - HLA to FHIR
    - HML2FHIR
    - TARR2FHIR

NMDP Okta logins

- Two applications require NMDP Okta logins
  - CIBMTR Reporting App (LogicaHealth)
  - HML Gateway – HML2FHIR

- Temporary user accounts and passwords sent to hackathon participants.
  - Same username/password works for both applications
  - No MFA needed

REST API authorization tokens

Access information sent to hackathon participants

- Direct FHIR API
  - Application Client ID
  - Application Client Secret
  - Application Client Scope
  - Service Account Username
  - Service Account Password

Needed to generate Bearer token

- HML Gateway API (used for HML2FHIR)
  - Refresh Token

CIBMTR Reporting Implementation Guide
0.1.4 - Trial Use 1

Home | Table of Contents | Artifact Index | Direct FHIR (STU3) | Support

Table of Contents > **Home**

This page is part of the CIMBTRReporting (v0.1.4: Trial Use 1) based on FHIR R4. This is the current published version. For a full list of available versions, see the Directory of published versions

1 Home

FHIR Version Note
This Implementation Guide is designed to use the R4 version of the HL7® FHIR® standard.
For information on submitting to our Direct FHIR endpoints using FHIR STU3, see the Direct FHIR for STU3 Guide.

Contents:
- Introduction
- CRID Lookup/Creation
- Highlighted Artifacts

This FHIR Implementation Guide (IG) describes how to send data to CIBMTR via HL7® FHIR®.

1.1 Introduction

The Center for International Blood & Marrow Transplant Research® (CIBMTR®) is a research collaboration between the National Marrow Donor Program® (NMDP)/Be The Match® and the Medical College of Wisconsin (MCW). The CIBMTR collaborates with the global scientific community to advance hematopoietic cell transplantation (HCT) and other cellular therapy worldwide to increase survival and enrich quality of life for patients.

The CIBMTR facilitates critical observational and interventional research through scientific and statistical expertise, a large network of transplant centers, and a unique and extensive clinical outcomes database. CIBMTR collects data for HCT recipients using a web-based manual data entry system (FormsNet) and an automated messaging system (A Growable Network Information System (AGNIS)).

CIBMTR is now collecting data through the HL7 Fast Healthcare Interoperability Resources® (FHIR®) standard. This IG describes the technical specification that CIBMTR accepts from third party clients producing FHIR resources for reporting HCT data. It is primarily based on the US Core FHIR IG which defines the minimum conformance requirements for accessing patient data.

Initially, this IG is focused on information required for sending Patient demographic data that is necessary for creating or retrieving a CIBMTR Research ID (CRID), and for reporting Patient resources with a known CRID. We have also begun specifying a profile for reporting laboratory observations, focusing on a set of variables that have been identified as a priority for the CIBMTR Data Transformation Initiative in Fiscal Year 2021.

1.2 CRID Lookup/Creation

A REST API is available for enabling users to lookup and/or create CRIDs based on patient demographic information. This is described in Direct FHIR for

https://fhir.nmdp.org/ig/cibmtr-reporting/

Why LogicaHealth?

- EHR simulator with thousands of synthetic Patients
  - Synthea
  - SMART-on-FHIR platform
- Flexibility in creating example Patients with data
  - QA & Testing different scenarios
  - Testing scalability
- Lowest common denominator for development
  - starting point for developing for other EHRs
  - make vendor specific changes only when necessary
- Provides a **free** playground for those that don't have Epic

Solutions » FHIR Sandbox

By: preston.lee / On: 2019-04-04

The FHIR Sandbox is a free service provided by Logica Health for the FHIR community to develop SMART-on-FHIR and other FHIR-backed applications. Web-based GUIs, an EHR simulator, and full OAuth support provide a easy-to-use environment for developers of all skill levels.

Launch The Logica Sandbox Now!

The Logica Sandbox is also available for download to run locally!

Terms of Use & Privacy Statement

Logica Platform Terms of Use

Last Modified: 04/05/2020

Acceptance of the Terms of Use

These terms of use ("**Terms of Use**") entered into between You and Logica, Inc. ("**Logica**", "**we**" or "**us**"), govern your access to and use of our software and application development platforms, including http://www.developers.logicahealth.org/ and https://sandbox.logicahealth.org (collectively, the "**Platforms**").

Please read the Terms of Use carefully before you start to use the Platforms. **By using the Platforms or by clicking to accept or agree to the Terms of Use below, you accept and agree to be bound and abide by these Terms of Use and our Privacy Policy, found BELOW, incorporated herein by reference.** If you do not want to agree to these Terms of Use or the Privacy Policy, you must not access or use the Platforms.

Also, the Platforms are offered and available to users who are 18 years of age or older and reside in the United States or any of its territories or possessions. If you are not 18 years old or older, or do not reside in the United States or any of its territories or possessions, do not use the Platforms.

Changes to the Terms of Use

We may revise and update these Terms of Use from time to time in our sole discretion. All changes are effective immediately when we post them, and apply to all access to and use of the Platforms thereafter. Your continued use of the Platforms following the posting of revised Terms of Use means that you accept and agree to the changes. We encourage you to check these Terms of Use often for updates.

Accessing the Website and Account Security

Access to the Platforms is provided to you solely for the purpose of developing healthcare software applications. We reserve the right to withdraw or amend the Platforms, and any service or material we provide through the Platforms, in our sole discretion at any time without notice. We will not be liable if for any reason all or any part of the Platforms is unavailable at any time or for any period.

To access the Platforms or some of the resources it offers, you may be asked to provide certain registration details or other information. It is a condition of your use of the Platforms that all the information you provide on the Platforms is correct, current and complete. You agree that all information you provide to register with the Platforms or otherwise, including but not limited to through the use of any interactive features on the Platforms, is governed by our Privacy Policy (**See Below**), and you consent to all actions we take with respect to your information consistent with our Privacy Policy.

If you choose, or are provided with, a user name, password or any other piece of information as part of our security procedures, you must treat such information as confidential, and you must not disclose it to
